

Super-a solren da! **Femazon** oda core concept, AI engine, and plan ellatheyum namma **Tamizh-la** puriyura madhiri simple-ah paakalaam.

1. Femazon-na Enna? Simple-ah Solla Pona...

Ippo oru pennukku oru Kalyanam or Event varudhunna, ava enna pannuva?

- Outfit-ukku **Myntra** or **Instagram**
-
- Jewellery-ukku thani store
-
- Makeup Artist-ukku **Google** or **Instagram Search**
-
- Mehendi & Photography-ukku verayaru kitta kepaa.
-

Femazon Oda Idea: En ellaathukum 10 app use pannanum?

Photo Upload $\rightarrow$ **AI Style Predict** **Pannum** $\rightarrow$ **Outfit + Jewellery + Makeup Artist + Photographer** ellaame **ORE PLACE-la** kidaikkum!

2. Main Features (Tamil Explanation)

AI Style Studio (The Signature Feature)

1. **Photo Upload:** Girl oru photo upload pannuvaa.
- 2.
3. **Occasion Choose:** Kalyanam, Office Party, Single Event-a nu select pannuvaa.
- 4.
5. **AI Recommendation:**
6.
 - Ungalukku entha **Colour (Palette)** nalla irukkum.
 -
 - Entha **Dress (Saree/Lehenga/Western)** suit aagum.
 -
 - Adhuku set aagura **Jewellery & Shoes**.
 -
7. **Local Service Connect:** Neenga select panna dress-ukku set aagura **Bridal Makeup Artist / Hairstylist** ah unga area-la katti booking pannaiyum vakkum!
- 8.

Digital Wardrobe (Virtual Bureau)

Unga veettula 10 Dress, 5 Jewellery, 3 Shoes irukku. Aana "Enna poduradhu?" nu confuse aagum.

- Unga dresse-a photo eduthu app-la upload panni **Virtual Wardrobe** create pannalaam.
-
- **AI Kitta Kekaalaam:** "Nalaikku Office-ukku enna wear pannanum?"

-
- Al unga kitta irukkura dress-aiye combine pann **Office Look** solloom.
-
- **Missing Match:** "Unga kitta Pink Saree irukku, aana adhu set aagura Gold Potli Bag illa. Femazon-la ₹999-ku irukku, vangikiringala?" nu marketplace-oda connect pannum.
-

Event Planner (Wedding / Birthday / Baby Shower)

- "Plan My Event" click panni **Event Type, Budget, Location** kuduthaa podhum.
-
- Complete Checklist ready aayidum: **Dress \$rightarrow\$ Jewellery \$rightarrow\$ Makeup Artist \$rightarrow\$ Photography \$rightarrow\$ Catering \$rightarrow\$ Decorators.**
-

Women's Ecosystem

- **Women-Owned Business Directory:** Pengal nadathura local businesses (Boutiques, Home Bakers, Freelance Photographers) verify panni promote pannuom.
-
- **Community:** Fashion, Beauty, and Career pathi discuss panna safe forum.
-

3. Development Plan (Epdi Build Panna Porom?)

Direct-ah code panna koodadhu. Namma phase-by-phase-ah thaana poganom:

4. Tech Stack (Namma Enna Language/Tools Use Panna Porom?)

Layer	Tech Tool
Frontend	Next.js (React) + Tailwind CSS (Super Fast UI)
Backend	Node.js / NestJS
Database	PostgreSQL + Prisma ORM
Search & AI	Python (AI Models) + Redis (Cache)
Payments	Razorpay / Cashfree (India Specific)

****Femazon**** app-oda core system work aagurathuku pitch-perfect-ah design panna ****Complete Database Schema**** padhi Tamil-la paakalaam.

Namma database-a ****7 Major Modules (Tables Group)****-ah pirichillukom. Idhu namma ****PostgreSQL / Prisma ORM**** vachi build panna poren schema.

📊 Database Architecture Overview (High-Level)

...

...

1. User & Authentication Module

App-la register panra ellaa users (Customers, Vendors, Service Providers, Admin) oda basic details inga thaana store aagum.

📄 Table: `users`

- * `id` (Primary Key - Unique UUID): User oda ID.
- * `full\_name` & `email` & `phone`: Contact details.
- * `password\_hash`: Encrypted password.
- * `role`: User ah, Vendor ah, illana Admin ah nu indicate pannum (`CUSTOMER`, `VENDOR`, `ADMIN`).
- * `profile\_pic\_url`: Profile photo path.
- * `created\_at`: Join panna date & time.

2. AI & Personal Style DNA Module

User upload panra photos, valiya AI extract panna Style Preferences, Undertones ellam inga thaana save aagum.

📄 Table: `style\_dna`

- * `id` (PK)
- * `user\_id` (Foreign Key $\rightarrow$ `users.id`): Entha user-oda style profile.
- * `skin\_undertone`: AI identify panna tone (`WARM`, `COOL`, `NEUTRAL`).
- * `face\_shape`: Face structure (`OVAL`, `ROUND`, `HEART`, etc.).
- * `body\_type`: Body posture/type details.
- * `preferred\_colors`: JSON array (eg: `["#FF5733", "#0060B5"]` - Preferred hex codes).
- * `disliked\_colors`: User-ku pidikkatha colors.
- * `budget\_tier`: Spend panna mudiya budget (`BUDGET`, `MID\_RANGE`, `LUXURY`).

3. Vendor & Business Directory Module

Sellers matrum Service Providers (Makeup artists, Photographers) oda Business profiles inga manage aagum.

 Table: `vendors`

- * `id` (PK)
- * `user\_id` (FK $\rightarrow$ `users.id`): Vendor-a irukku user account.
- * `business\_name`: Cadence/Shop Name (e.g., *Priya Bridal Studio*).
- * `business\_type`: `PRODUCT\_SELLER`, `SERVICE\_PROVIDER`, or `BOTH`.
- * `is\_women\_owned`: Boolean (`TRUE` / `FALSE`) - Women-Owned status.
- * `is\_verified`: Admin verify pannu kudutha Badge status.
- * `location\_lat` & `location\_lng`: Nearby search-ku exact GPS location.
- * `rating\_avg`: Overall rating (e.g., 4.8).

4. E-Commerce (Products & Orders) Module

Fashion products (Dresses, Sarees, Jewellery, Shoes) matrum adhodha sales transactions handling.

 Table: `products`

- * `id` (PK)
- * `vendor\_id` (FK $\rightarrow$ `vendors.id`): Entha vendor-oda product.
- * `title` & `description`: Dress / Item name.
- * `category`: `SAREE`, `LEHENGAS`, `JEWELLERY`, `FOOTWEAR`, etc.
- * `color\_family`: AI Engine matching panna specific color (`PASTEL\_PINK`, `NAVY\_BLUE`).
- * `price` & `discount\_price`: Selling price.
- * `stock\_quantity`: Available units.
- * `images`: JSON array of product photos.

 Table: `orders` & `order\_items`

- * `order\_id` (PK)
- * `customer\_id` (FK $\rightarrow$ `users.id`)
- * `total\_amount` & `payment\_status`: (`PENDING`, `PAID`, `FAILED`).
- * `order\_status`: (`PROCESSING`, `SHIPPED`, `DELIVERED`).
- * `items`: List of `product\_id`, `quantity`, and `unit\_price`.

5. Services & Booking Module

Services like Bridal Makeup, Mehendi, Photography booking-kaana schema.

📄 Table: `services`

- * `id` (PK)
- * `vendor\_id` (FK $\rightarrow$ `vendors.id`): Service provider ID.
- * `service\_name`: E.g., *HD Bridal Makeup*, *Saree Draping*.
- * `duration\_minutes`: Evvalavu neram aagum (e.g., `120` mins).
- * `price`: Service charge.
- * `service\_type`: `AT\_VENUE` (Client veettuke poyi panradhu) or `AT\_SALON`.

📄 Table: `service\_bookings`

- * `id` (PK)
- * `customer\_id` (FK $\rightarrow$ `users.id`)
- * `service\_id` (FK $\rightarrow$ `services.id`)
- * `booking\_date` & `time\_slot`: Slot timing.
- * `event\_location`: User kudukkura address.
- * `booking\_status`: (`REQUESTED`, `CONFIRMED`, `COMPLETED`, `CANCELLED`).

6. Digital Wardrobe Module (Virtual Bureau)

User veettula vachirukura clothes-a photo eduthu save panra table.

📄 Table: `digital\_wardrobe\_items`

- * `id` (PK)
- * `user\_id` (FK $\rightarrow$ `users.id`)
- * `image\_url`: Upload panna photo URL.
- * `category`: `TOPS`, `BOTTOMS`, `SAREES`, `BAGS`, `JEWELLERY`.
- * `detected\_color`: AI identify panna color.
- * `occasion`: (`CASUAL`, `FORMAL`, `FESTIVE`).
- * `last\_worn\_date`: Intha dress kadasiya eppo wear pannanga nu track panna.

7. AI Look Recommendation & History Module

AI create panna complete looks & user click/purchase panna history.

📄 Table: `ai\_looks`

- * `id` (PK)
- * `user\_id` (FK $\rightarrow$ `users.id`)
- * `occasion`: ('WEDDING_GUEST', 'OFFICE_PARTY', etc.)
- * `recommended\_product\_ids`: JSON Array (Dress ID + Jewellery ID + Shoes ID).
- * `recommended\_service\_ids`: JSON Array (Makeup Service ID).
- * `is\_purchased`: User antha outfit-a buy pannangala nradhu.

📄 Prisma Schema Sample Code (`schema.prisma`)

Namma Next.js / Node.js backend-la use panna pora exact schema definition snippet:

```
``prisma
datasource db {
  provider = "postgresql"
  url      = env("DATABASE_URL")
}

generator client {
  provider = "prisma-client-js"
}

enum Role {
  CUSTOMER
  VENDOR
  ADMIN
}

enum Undertone {
  WARM
  COOL
  NEUTRAL
}

model User {
  id          String    @id @default(uuid())
  fullName    String
  email       String    @unique
  phone       String    @unique
```

```

passwordHash String
role      Role      @default(CUSTOMER)
styleDna  StyleDna?
vendorProfile Vendor?
wardrobe  DigitalWardrobe[]
orders    Order[]
bookings  ServiceBooking[]
createdAt DateTime  @default(now())
}

model StyleDna {
  id      String  @id @default(uuid())
  userId  String  @unique
  user    User    @relation(fields: [userId], references: [id])
  skinUndertone Undertone?
  preferredColors String[] // Hex code strings
  budgetTier String  @default("MID_RANGE")
}

model Vendor {
  id      String  @id @default(uuid())
  userId  String  @unique
  user    User    @relation(fields: [userId], references: [id])
  businessName String
  isWomenOwned Boolean @default(true)
  isVerified Boolean @default(false)
  products Product[]
  services Service[]
}

model Product {
  id      String  @id @default(uuid())
  vendorId String
  vendor  Vendor  @relation(fields: [vendorId], references: [id])
  title   String
  category String
  colorFamily String
  price   Float
  stock   Int     @default(1)
}

model DigitalWardrobe {
  id      String  @id @default(uuid())
  userId  String

```

```

user      User    @relation(fields: [userId], references: [id])
imageUrl  String
category  String
detectedColor String
createdAt DateTime @default(now())
}

...

```

Femazon Phase 1 MVP kkaana Next.js (App Router) project structure and setup steps-a step-by-step-ah paakalaam.

Phase 1 MVP-oda main goal: **User Auth + Product Marketplace + Service Provider Directory & Booking System + Admin Dashboard.**

Step 1: Initial Tech Stack Setup (Commands)

Unga terminal-la intha commands run panni, project-a setup pannunga:

Bash

1. Create Next.js App with TypeScript & Tailwind CSS

```
"@/!"
```

2. Enter Project Directory

```
cd
```

3. Install Core Dependencies

UI Components & Icons

Database & Authentication

Install Prisma CLI as Dev Dependency

Initialize Prisma Engine

Step 2: Next.js (App Router) Clean Directory Structure

Next.js 14/15 App Router standard-la, code modular-ah irukkura madhiri folder structure design panni irukkom:

Plaintext

Step 3: Key Config Files Setup

1. Database Connection (`src/lib/prisma.ts`)

Prisma instance multiple times create aagama erukka singleton pattern setup:

TypeScript

```
import { PrismaClient } from '@prisma/client'

const prisma = global as PrismaClient

export const prisma = new PrismaClient({
  log: ['query']
}).$connect()

if (process.env.NODE_ENV === 'production') {
  prisma.$connect()
}
```

2. Environment Variables (`.env`)

PostgreSQL connection URL and secret key-a set pannunga:

Code snippet

Step 4: Phase 1 Action Plan Execution Sequence

1.Database Initialization:Local/Cloud PostgreSQL setup.

Unga `.env`-la `DATABASE_URL` update panna apram schema-va database-ku push pannunga:

Bash

2.Setup NextAuth & User Roles:Customer, Vendor, Admin Auth.

src/lib/auth.ts file-la credentials provider and JWT session setup panni authentication logic-a configure pannunga.

3.Build Vendor Onboarding & Product Entry:Inventory setup.

Vendors thanga clothes/jewellery items matrum services (Bridal Makeup, Mehendi) list panradhukaana forms (AddProductForm, AddServiceForm) build pannunga.

4.Build Customer Search & Booking Flow:Core Marketplace.

Customer App-la Listing pages, Location-based Services Filter, Cart, and Slot Selection Booking Modal UI finish pannunga.
